

CSR – Corporate Social Responsibility – covers both charity and legal requirements, such as **Occupational Health & Safety, Social Accountability, Environment**. This means that today stakeholder's interest – employees, customers, suppliers, the local society, etc – are included in the CSR concept and CSR has been used more and more widely.

Why is a CSR programme necessary for your organization?

CSR – giving your business a competitive advantage and a key of sustainable development.

With the increasing awareness of people on health, safe working environment, the effective CSR programme will help you:

- **Good reputation and brands**
- **Efficient operations, reduce risk and unexpected cost**
- **Increase sales and consumer**
- **Loyalty and ability to retain talented employees**
- **Creating new business opportunities**
- **Attracting investment and business partners, etc.**
- **Your company will become more innovative, productive and competitive.**
